Overview

The investment objective of the Fund is to achieve long term capital appreciation primarily through investing in global equities with market risk hedging. The Fund may also invest in other asset classes to achieve the investment objective.

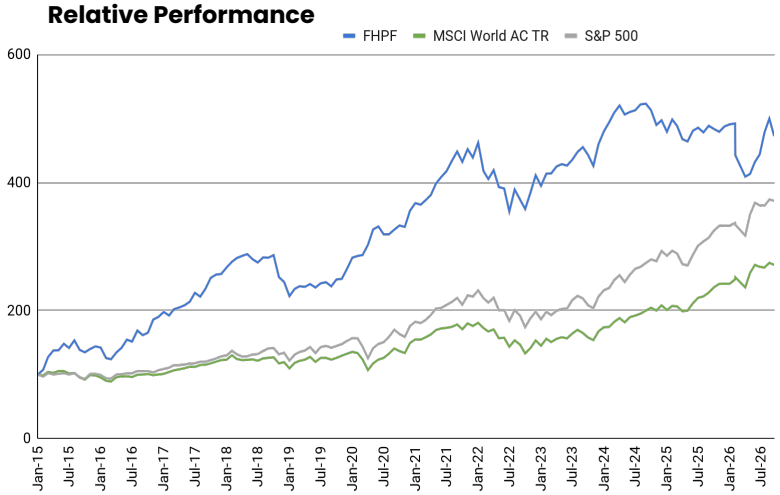

Strategy

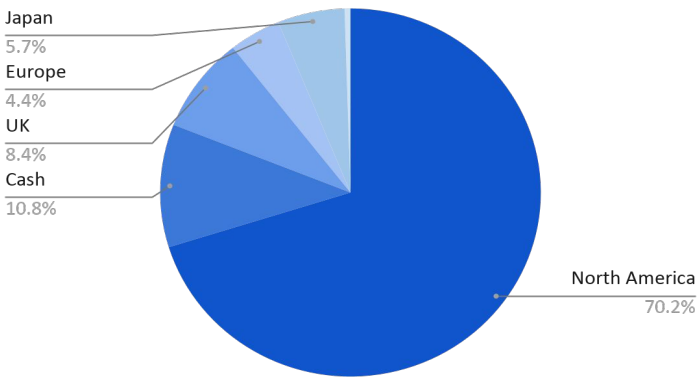

The Fund's value-driven strategy targets quality businesses mispriced by fear rather than fundamentals. This approach often surfaces an out-of-favor set of companies with more attractive valuations and stronger profitability than the broader market. We hunt for the widest anomalies between price and worth, building a contrarian portfolio positioned to provide superior long-term returns for patient investors.
